To whom it may concern,

I would like to say Thank You for opening public comment on these proposals for the United States Postal Service. My comments will refer to our recent, current and future service.

We have always had excellent service until some noticeable changes in the last year. Our packages take much longer coming from other states, but even our in state service takes much longer. We now have to pay bills earlier or face late fees. I am a veteran of 24 years with a complex cancer diagnosis, and my medication deliveries have become unreliable. I receive a dozen life saving medication in the mail. I cannot get them filled sooner as the Veterans Administration dictates the timetable for refills, so when they take longer I am forced to go without.

Please consider the consumer when considering these changes. If there are more cuts to service or we lose our local post office, these problems will only be increased. We prefer to have rate increases to reductions in service. We have always chosen to do our business with the USPS when given a choice of providers. Please don't force us to use corporate carriers.

Thank you,

James Gorecki
